João Sérgio Viegas

Lisbon, Portugal | joao.viegas@rnl.tecnico.ulisboa.pt | github.com/joaosviegas | linkedin.com/in/joao-sergio-viegas

Education

Instituto Superior Técnico — University of Lisbon Lisbon, Portugal
Master's Degree in Informatics and Computer Engineering (Expected) *09/2026 — 07/2028*
- Specialized in Software Engineering & Enterprise Systems

Instituto Superior Técnico — University of Lisbon Lisbon, Portugal
Bachelor's Degree in Informatics and Computer Engineering *09/2023 — 07/2026*
- Final GPA: 15.85/20
- Relevant coursework: Software Engineering, Systems Analysis and Modeling, Human-Computer Interaction.

Experience

Full-Stack Developer 11/2025 — Present
DEI - Department of Computer Science @ Instituto Superior Técnico *Hybrid*
- Developing internal applications and managing systems for the Department.
- Buiding a platform to integrate the mobility students managing with the rest of the Department's existing apps.

Founder & Website Designer 01/2025 — Present
Discrete Design *Remote*
- Founded and run a freelance business creating custom Squarespace websites for nonprofits, founders, and solo entrepreneurs.
- Led end-to-end projects: client discovery, information architecture, visual design, content integration, and site launch.
- Managed timelines, client communication, and delivery. Portfolio: here.

Selected Projects

Lead Developer, Vasseapraia.pt (github.com/joaosviegas/VasseAPraia) 06/2025 — Present
- Designed and implemented a recommendation system ranking beaches in Madeira by combining API data (weather, sun exposure, wind, accessibility).
- Built with Python (backend) and React (frontend).
- Deployed frontend on Cloudflare Pages and backend on Railway; maintained version control with Git.

Full-Stack Developer, DEI Academic Management System (github.com/joaosviegas/DEI-AMS) 09/2024 — 10/2024
- Engineered a robust academic platform using **Java 21**, **Spring Boot**, and **PostgreSQL**, fully containerized with **Docker** for scalable deployment.
- Implemented complex business logic, including a multi-stage grade review state machine and an algorithm for automatic assessment conflict detection.
- Developed a reactive **Vue.js** (TypeScript) frontend with Role-Based Access Control (RBAC) and integrated asynchronous email notifications via SMTP.

Extracurriculars & Other Interests

CCIST 09/2023 — 11/2025
- Member of IST's Brewers Club — Production and Investigation Department.

Logo Design 01/2024 — Present
- Won and participated in logo design contests in Madeira, including municipal-level competitions.

Skills

- **Programming:** Java, Python, C, SQL (PostgreSQL).
- **Frontend:** JavaScript, Vue, CSS.
- **Tools:** Git, Linux.

Awards & Certifications

- Research Grant @ DEI.
- Gulbenkian Merit Scholarship.
- Winner, Funchal Municipal Assembly Logo Design Contest.
- Merit Award in Systems Analysis and Modelling 2025/2026.
